

Portable Monitoring - Noise

Real-time, wireless, portable environmental monitoring for safe, compliant worksites

PMK NOISE

Adroit is New Zealand's leading real-time environmental monitoring provider for councils, worksites, construction, civil and heavy industries.

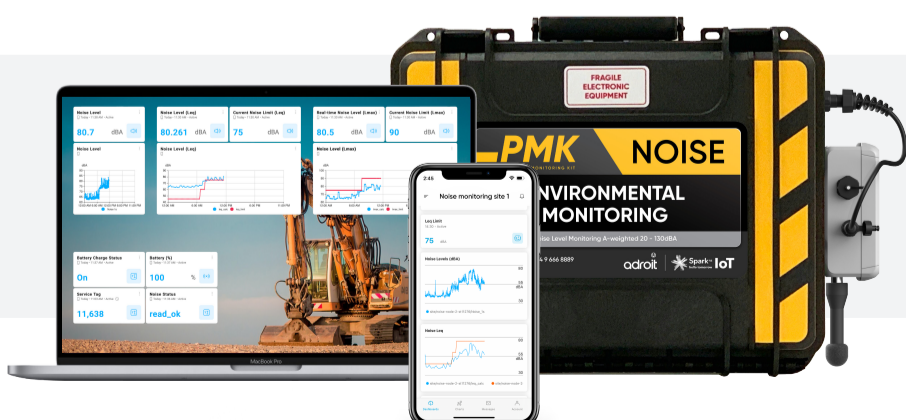

Portable Worksite Monitoring - Noise

Being smarter about how you navigate environmental and health and safety requirements is the best way to avoid costly downtime. The Adroit Portable Monitoring Kit (PMK) gives you the ultimate on-site visibility, so you have data for better management of health and safety, compliance and complaint mitigation.

Proactive noise (dB) monitoring on worksites helps ensure a safer, healthier environment for your workers and the public. With quick and easy installation your team gains access to real-time data which is visualised on the Adroit App, accessible from any connected device.

The Adroit App - designed for the worksite.

Visualise the noise level from your site activity on any connected device

Compliance Reporting

Adroit products provide accurate, cost effective, continuous monitoring to assist with health & safety, complaint mitigation and internal compliance management. Sensors are validated to compliance standards, however for some applications are not suitable for statutory compliance reporting. We recommend discussing your reporting requirements with your Adroit sales lead and where appropriate consulting a compliance specialist.

Key benefits

Portable

Quick and easy set-up. Rugged case for transportation, various mounting options

Real-time monitoring

Get a clear view of the environmental noise levels on your site

Feature rich app

Customisable thresholds and alerts. Downloadable data and APIs available for integration

Accurate measurements

Highly accurate and factory calibrated sensors measures worksite noise (dB)

Health and safety

Ensure a compliant, healthy and safe worksite for employees, communities and environments

Compliance and complaint mitigation

Historic and real-time data to aid management of compliance and complaint mitigation

How it works

Portable noise monitoring features

- Battery life up to 1 working week* from fully charged
- Rugged casing IP67 waterproof. (414 x 345 x 129 mm, weight 5.4kg)
- Charging from AC mains power or can be mains powered
- Highly accurate sensor measures worksite noise (dB)
- Sensor measures noise continuously and transmits data to Cloud
- Mount via 5/8" tripod connection (tripod not included) or optional wall/post mount bracket
- Suitable usage for all construction, civil and worksites
- Automatic wireless connection via the Spark Cat-M1 network

*Battery life based on a 50hr standard work week

Making environmental compliance easier for Dempsey Wood

Dempsey Wood is a family owned innovative civil engineering company that has embarked on a journey in the world of IoT, to help solve noise - one of their biggest environmental challenges.

"Environmental IoT technology gives Dempsey Wood a good understanding of our site activities from real time data, and this enables us to run a safe and compliant work site for our employees and the wider community."

WALT KERKMEER
PROJECT MANAGER, DEMPSEY WOOD
